(25 note sets available for handbells only - Model #RB118XX)

**Desk bells**

KidsPlay® Deskbell Sets feature bright colors and correct intonation. Sure to be a hit with kids of all ages! Each individual bell includes the name of the note and number making it possible to easily play hundreds of songs. The buttons on the deskbells make it easier to play melodies and make it possible for one bell ringer to play multiple bells. Bell mechanisms are well protected from the curious hands of preschool aged children. Deskbell sets are available in the same ranges as the Handbell sets.

**Combined Bells**

KidsPlay® Handbell/Deskbell combination sets conveniently combine the features of both the KidsPlay® Handbells and Deskbells into one handy and versatile product. These sets feature the same bright colors and correct intonation as all KidsPlay® bell products. The special mechanism not only allows the bells to be played either by pushing the button or by hand ringing, but also helps to reduce the "double ringing" effect when playing melodies. In addition, when using the chord playing (tremolo) method, this mechanism can help to soften the volume which is helpful when multiple bells are ringing at the same time.

**SP2400 Time for Bells Curriculum Guide and Lesson Book & CD \$22.05**

By Alan Hager. 12 sequenced units to help you get the most out of your KidsPlay® handbells, deskbells or combined bells. These lessons introduce a variety of musical concepts and take advantage of the full line

of bells and accessories including the color coded cards. Many of the examples in the book include CD recordings with and without bells. A reproducible section is included for use with your students. Begins with basic 8 note diatonic bell sets and progresses to full 20 note sets. Introduces concepts of melody, chords, note reading, accompaniment, ear training, composition and more! Your students will look forward to learning when you tell them it's "Time for Bells."

**Tips on Getting Started With Your Color-Coded Handbells**

**How many bells do I need?**

The number of bells needed is determined by the number of bell ringers in your group. You'll need more bells than the number of bell ringers, since there are few songs that will use all of the bells. As a general rule, you'll want to have at least twice the number of bells as the number of bell ringers. For example, if you have 12 bell ringers, and you're playing a song that only uses 5 of the 8 notes in an RB108 set, you'd need to have 3 sets of RB108 in order for each bell ringer to be involved.

**Which books for which ages?**

Use a mixture of melody method and chord method playing in order to introduce both musical concepts. If your school or church has been using the bells for a while, you may choose more advanced materials in order to challenge the students. The "Time for Bells" curriculum guide and lesson book is a valuable resource for helping you choose materials appropriate for your level. You'll also want to carefully read the descriptions of each book to see which bells are needed and to determine if both the chord and melody methods can be used for that book.

**RB2130 Rhythm Band Resonator Bell Set \$24.95**

This brightly colored C-c diatonic bell set has case included along with pair of mallets. Great for school or home! Play individually or as a complete set. Colors match the KidsPlay handbells. For ages 3 and up.

**Chord method description**

As a general rule, the chord method is easier, since the chords do not change as quickly as the melody notes. For the chord method, the level of difficulty is determined by the number of chords used and the speed at which they change. The chord method is achieved by gently shaking the bell back and forth. For the 8 note bell sets, use the SP2389 set of 7 cards for directing the chords. For chromatic bell sets, use the SP2390 set of 36 cards. In order to make your job as a director much easier, use the LRCH8 card holder. The chord method can be used with any music which has the chord symbols printed, including LRSB19, RB7014, RB7015, RB7017, SP2391, SP2392, SP2395, SP2397, SP2401, SP2404, SP2405 and SP2410. You may also use your own music, as long as the chords are major, minor or dominant 7th. Make sure to determine which chords are used in the song and hand out the bells which are part of those chords.

**Melody method description**

Playing the melodies is done by handing out one or more bells to each ringer and instructing them when to ring their bells as part of the melody. This is done one of several ways: For preschool through early elementary, you can use the Melody Cards LRMC96. For more experienced bell ringers, you can photocopy the bell music (you are granted the rights to copy the music for the use of individual bell ringers) and then mark the notes with a highlighter. Prepare a separate sheet of music for each bell that is part of the song you're performing. You may want to use colored markers. The ColorStaff LRCS30 by Little Ringers also works well for directing melodies.

## Ring Leader Handbell Performance System

The Ring Leader DVD series features DVDots, the world's quickest and easiest performance tool for handbell ringers. DVDots is a patent pending system consisting of musical accompaniment and automatic color coded cues all rolled into one DVD. The melody is performed by a solo instrument in the fully orchestrated accompaniment while DVDots provide bell chords to complete the performance. Instant success makes bells fun from the very first ring. Simply press play, sit back and enjoy a perfect performance every time. DVDots are preprogrammed with the perfect amount of delay (accurate to 1/30th of a second) allowing ringers time to react after seeing their color. Each DVDot appears in the same place every time, giving bell ringers a defined area of focus.

**Joia Tubes® by Unity Through Percussion®**

Elementary and secondary school music teachers have been incorporating Joia tubes into their music programs with great success. Joia Tubes are also used in many universities and clinics in the US and abroad in the study of Autism, Alzheimer's and Disruptive Personality Disorders. This is breakthrough research, and the results thus far have been very encouraging. The tubes are designed to be an orchestral sounding instrument. By sealing the bottom of the tube and resonating the sound back out through the top of the instrument, the resonating effect is doubled, allowing for a more sustained note. Also, the concave design on the playing surface compresses more air into the tube, giving even greater resonance and volume. The stand allows for tremendous flexibility and also allows the tubes to

resonate to their full effect. The Joia Tubes, whether used professionally, educationally or therapeutically, offer rich, melodic and specific pitches that resonate as a beautiful musical instrument. Made in the USA. All sets include two mallets. Oversize shipping charges may apply.

**Studio 49 Series 2000**

The instruments of the premium Series 2000 satisfy the highest musical standards and are excellent for use in music and grade schools. All instruments, with the exception of glockenspiels, have resonance boxes of solid

wood and handles for easy transportation. The handles also serve as supports for the optional stands (call for pricing.) Adjusting the instruments on the stands is easy with the turn of a screw, for a quick change of instruments and uninterrupted instruction. For maximum volume, the alto and bass instruments include several proportioned resonance chambers and sound-reinforcing lips on the dividers. Only hand-selected and expertly cured Amazon Jacaranda Rosewood is used in the legendary 2000 series. The Series 2000 Metallophone bars consist of special profiled, high-quality aluminum. This contributes to the exceptionally balanced and warm sound.

**Studio 49 Series 500 Easycussion**

This barred instrument series is in the alto range using the 6 note C major pentatonic scale, ideal for the first steps in music for young and old. The pentatonic scale allows a harmonic sound no matter which tones are played in which order, making these instruments highly appropriate for musical accompaniment as well as playing simple melodies. Notation is included on each instrument in c-d-e-g-a-c and do-re-mi-sol-la-do. Compact construction allows the instrument to be played either on your lap or on a table. Mallets and bars are attached to the instrument. The easy-to-play wide bars are made of bright rosewood (xylophone), aluminum (metallophone), or special steel (glockenspiel). Resonance boxes are made of solid pine. These instruments feature a compact design with integrated handles, and fabric-coated bar seating for lasting durability. They can also be stored in a standing position.

**Studio 49 Series 1600**

The sonorous entry model for the price conscious offers all possibilities for later expansion. Available in the soprano to the bass range, in single and double-row (chromatic) models. For professional music

lessons, these instruments fulfill every need. High quality bars combined with complex resonance chambers in the alto and bass ranges always produce ample volume and rich, strong sound. The instruments in the bass range are extremely compact. Compared to conventional instruments, the bass resonance box size is drastically reduced (patented design.) All xylophones and metallophones in the Series 1600 have a particularly stable resonance box made of 12 mm varnished pine, as well as handles for simple transportation. The handles also serve as supports for the optional mobile instrument stands.

**Discovering Orff \$35.95**  
 By Jane Frazee and Kent Kreuter. This book provides detailed, practical assistance in how and why to use Orff techniques and materials in the classroom. Goals are outlined and the best ways to achieve them are explored, but the principal focus is on the arrangement of the curriculum in a logical sequence. Such a structure provides a reasonable progression from simple to more complex objectives from day to day and year to year.

**BPPHST High Sticking Book Only \$17.95**  
 This book contains 10 marimba pieces presented according to their degrees of difficulty, ranging from beginner to advanced levels. All of the arrangements were inspired by authentic, Shona-style marimba music from Zimbabwe, but each has its own unique groove.

**BPPHT Here's Two Book & CD-Rom \$22.46**  
 By Patrick Ware. This book of original jazz tunes for Orff classes has teaching suggestions, full scores, listening suggestions, and lots of helpful information about jazz styles. **Exploring Orff \$49.45**  
 A Teacher's Guide, by Arvida Steen. How can I form a curriculum that addresses my students' needs? How can I choose the best materials for my lessons from the abundance of materials available? How can I plan lessons from the abundance of materials available? How can I plan lessons that have a clear focus and are also open to frequent student contributions? "Exploring Orff" addresses these critical questions.

**Music for Children (American Edition)**  
 This edition follows the tradition of Schulwerk editions from other countries and contains some vocal and instrumental material from the original Schulwerk. However, most of the material has been contributed by leading educators using material developed in American classrooms, that reflects the vast panorama of the cultural heritage of the United States. Photographs and sample lessons illustrate the work. In all volumes there are several articles, each dealing with a specific topic within the field of Music and Dance Education. While specifically designed with music teachers in mind, these durable, coated cards can also work as a creative resource for classroom teachers.

By Kerry Heisler, this collection of vocal warm-ups was developed from a need identified in the author's private teaching practice. It was first published as a book/CD titled, "Strictly Warm-ups". This is the digital version to use with computer/projectors, IWB, or SMART Boards. There are five different sets of warmups. Each set includes a physical warm-up, breath awareness, and exercises to work on range, diphthongs, vowels, diction, and swing rhythms. The author suggests using each set for at least three rehearsals to allow vocalists to become familiar with the warm-ups, and then move on to the next set. Now this collection is available in a projectable format with linked audio. Each of the exercises is recorded by a female and male singer. The singers model how to do the exercises, then drop out so your choir can sing with the piano accompaniment. You can use this product with any computer/projector or interactive whiteboard. It's given in two different formats. For teachers with any IWB or computer projector, we've included an interactive PDF file. For teachers with a SMART Board, we've included the warmups in a SMART Notebook file.

**Conversational Solfege by John M. Feierabend**

Conversational Solfege is a dynamic and captivating general music program that enables students to become independent musical thinkers with the help of a rich variety of folk and classical music. With the Conversational Solfege approach, music literacy starts with great literature and an “ear-before-eye” philosophy that correlates with the National Standards. Great songs are broken down into their component parts and then reassembled so students can bring greater musical understanding to what they do. The ultimate goal is to create fully engaged, independent musicians who can hear, understand, read, compose, and improvise. The Teacher’s Manual is packed with tone and rhythm card games, reproducible templates, and engaging teaching techniques that make learning and participating a blast. Included is an extensive assessment section by Dr. Clark Saunders, which will enable you to more completely track the progress of each student. Each book contains varied level song material appropriate for the lower grades or older beginners.

~Mail support to teachers

~Recorder instruction included

For less than \$2000, a school can have a standards based K-6 music curriculum with songs and activities that students LOVE! Musicplay is an award-winning music program for elementary schools. Musicplay is a sequential program with lessons that follow the calendar year. The weekly lesson outlines the new concepts that will be taught, those that will be reviewed, and includes seasonal and holiday repertoire. Important concepts are taught through play. Each week in Grades 1-3, and every two weeks in 4-5, a new singing game is featured. This is a text that will have your students really excited about learning music! Music specialists with training in either Orff or Kodaly will find that Musicplay works well with either methodology. Orff arrangements for Grades 1-5 are found in The Orff Source Vol 1. (TV730.) Vol. 2 (TV740.) and Vol. 3 (TV750.) Music literacy is presented sequentially throughout the curriculum so that students become sight-singers. Extensive listening lessons, maps, and activities are included in the Listening Resource Kits. The Digital Resources for Musicplay include Smartboard files, PowerPoint files and QuickTime movies of each song in the curriculum! The PowerPoints are large and much clearer than scanned documents. The audio is linked in the PowerPoints, in the Notebook files and in the QuickTime movies. Musicplay meets and exceeds MENC curriculum standards.

The baby birds are getting bigger and it's time for them to leave the nest and try to fly. But not this little batch of nesters! **V21DS Gettin' It Together \$17.95**

For all musicians regardless of ability! If you use this set with Volume 1, you will have a solid foundation to meet any new challenge. This set covers major, minor (dorian, harmonic and melodic), dominant 7th, half-diminished, lydian, and sus. 4. It also has a very slow blues in F and one in Bb. 31 different tracks with a lot of variety! CD tracks have been recently extended to allow more practice time without interruption. Includes practicing tips, ear training, nomenclature, chromaticism, digital patterns, cycle & fourth exercises, double-time passages, comments to band directors (concert, stage/jazz, orchestra, and vocal), backgrounds for warm-ups, exercises which correspond to the written tracks, and more!

**V24DS Major & Minor in All Keys \$17.95**

Includes 2 CDs. For all instrumentalists and vocalists. CDs contain 30 extended tracks of recorded background. Great primer for learning basic skills in major and minor keys. Advanced players will want to work on "double-timing", playing "outside" and "side-slipping" in all keys at comfortable tempos. Special tracks have Jamey Aebersold playing various exercises and soloing on his saxophone with actual cuts from Volume 24 so you can hear and see how to use this set. All exercises and sax solos on the demo tracks are transcribed and written out in the book! Pick a different key each day/week/practice.

**V42DS Blues in All Keys \$14.31**

Beginner/Intermediate. Here's a great way to expand your blues playing in every key! Slow tempos for all levels of ability. Try playing some of the tougher keys without looking at the music and see just how fast your ear takes over. You'll find yourself gaining confidence very quickly and that will greatly improve your soloing. Charlie Parker learned the Blues in all 12 keys before he learned anything else. Transposed for all instruments. Each key contains a different blues melody and two compatible chord/scale progressions.

The Real Books are the best selling jazz books of all time. Since the 1970's, musicians have trusted these volumes to get them through every gig, night after night. Hal Leonard is very proud to present the first legitimate and legal editions of these books ever produced. These books are popular amongst professional musicians, educators and students and now include genres of music other than jazz.

Many written patterns will open your ears and extended tracks will allow you to practice licks and patterns, refine your technique and reaction time, and give you the skills to navigate Dominant 7ths with confidence.

By breaking down the complex and overwhelming lexicon of jazz into tangible tidbits of musical information, this jazz method book helps students take a systematic and hands-on approach to learning improvised music. Those who always wanted to learn how to play jazz but were intimidated by the chord changes will succeed with JazzDeck. Includes quickstart instructions, Detailed theory instructional card for each of the four chord types: Major, Minor, Dominant, Minor Seven Flat Five, all twelve keys decoded and color-coded for each chord type, poker-sized cards printed on German casino quality 310gsm card stock with black core (linen finish) housed in a sturdy clear plastic box with carrying case.

## About Groth Music

Groth Music was founded in 1939 by Chester E. Groth, a professional musician, who sought to bring a quality music store to Twin Cities musicians. Once established, Groth Music earned a reputation of integrity, a place where one could find a knowledgeable sales staff and quality merchandise at fair prices. Groth Music remained at its downtown location for nearly 50 years until the boom of skyscrapers forced the last vestige of the old fashioned music store out of Minneapolis. Chester Groth died in 1985 and ownership was assumed by his daughter. Nancy Groth-Kersten expanded inventory to include printed music, ethnic instruments from around the world, and gift items not normally found in the Twin Cities. Since the late 1990's, the company has continually expanded its nationwide customer base while still remaining a single location business. Groth Music is still an old fashioned family music store with an emphasis on quality products, integrity and satisfied customers. We invite you to entertain yourself by visiting our 20,000 square foot showroom in Bloomington, MN. We are conveniently located less than 3 miles from the Mall of America and near the Twin Cities International Airport.

## About Eble Music (Now part of Groth Music!)

Eble Music Company has been serving musicians in the U.S. and around the world since 1950. In May of 2014, the owners of Eble Music retired and passed on the legacy of Charlie Eble's world renowned store to the very capable hands of Groth Music's industry-leading printed music department. Eble Music's areas of specialties were a perfect complement to those at Groth Music, creating what is now arguably one of the finest printed music establishments in the world.

## About MPI (Now part of Groth Music!)

In 2013, Groth Music acquired the assets and brand names of Music Products Inc. (MPI) including all of the popular MPI recorder brands. After many years of serving music educators across the country, the owners of MPI decided to retire, but wanted to ensure that their loyal customers were taken care of with the same quality products, great service and competitive pricing that MPI was known for. MPI felt that Groth Music would be the perfect fit to take on this responsibility. Serving music educators, students and professionals since 1939, Groth Music brings a wealth of knowledge and experience to MPI customers and offers a substantially larger selection of inventory. Groth Music will continue to offer all of the MPI recorders and other educational items which music teachers have come to trust over the years. We look forward to exceeding your expectations as we serve all of your musical needs.
